Why?

These math puzzles are designed for math centers, games, and review activities! They provide students with just the right amount of practice with a skill, in a fun and engaging way.

Want easy prep math centers?

Math puzzles are perfect! Students learn the instructions once, but you can switch out the math skill. No prep student puzzle pages are included, too.

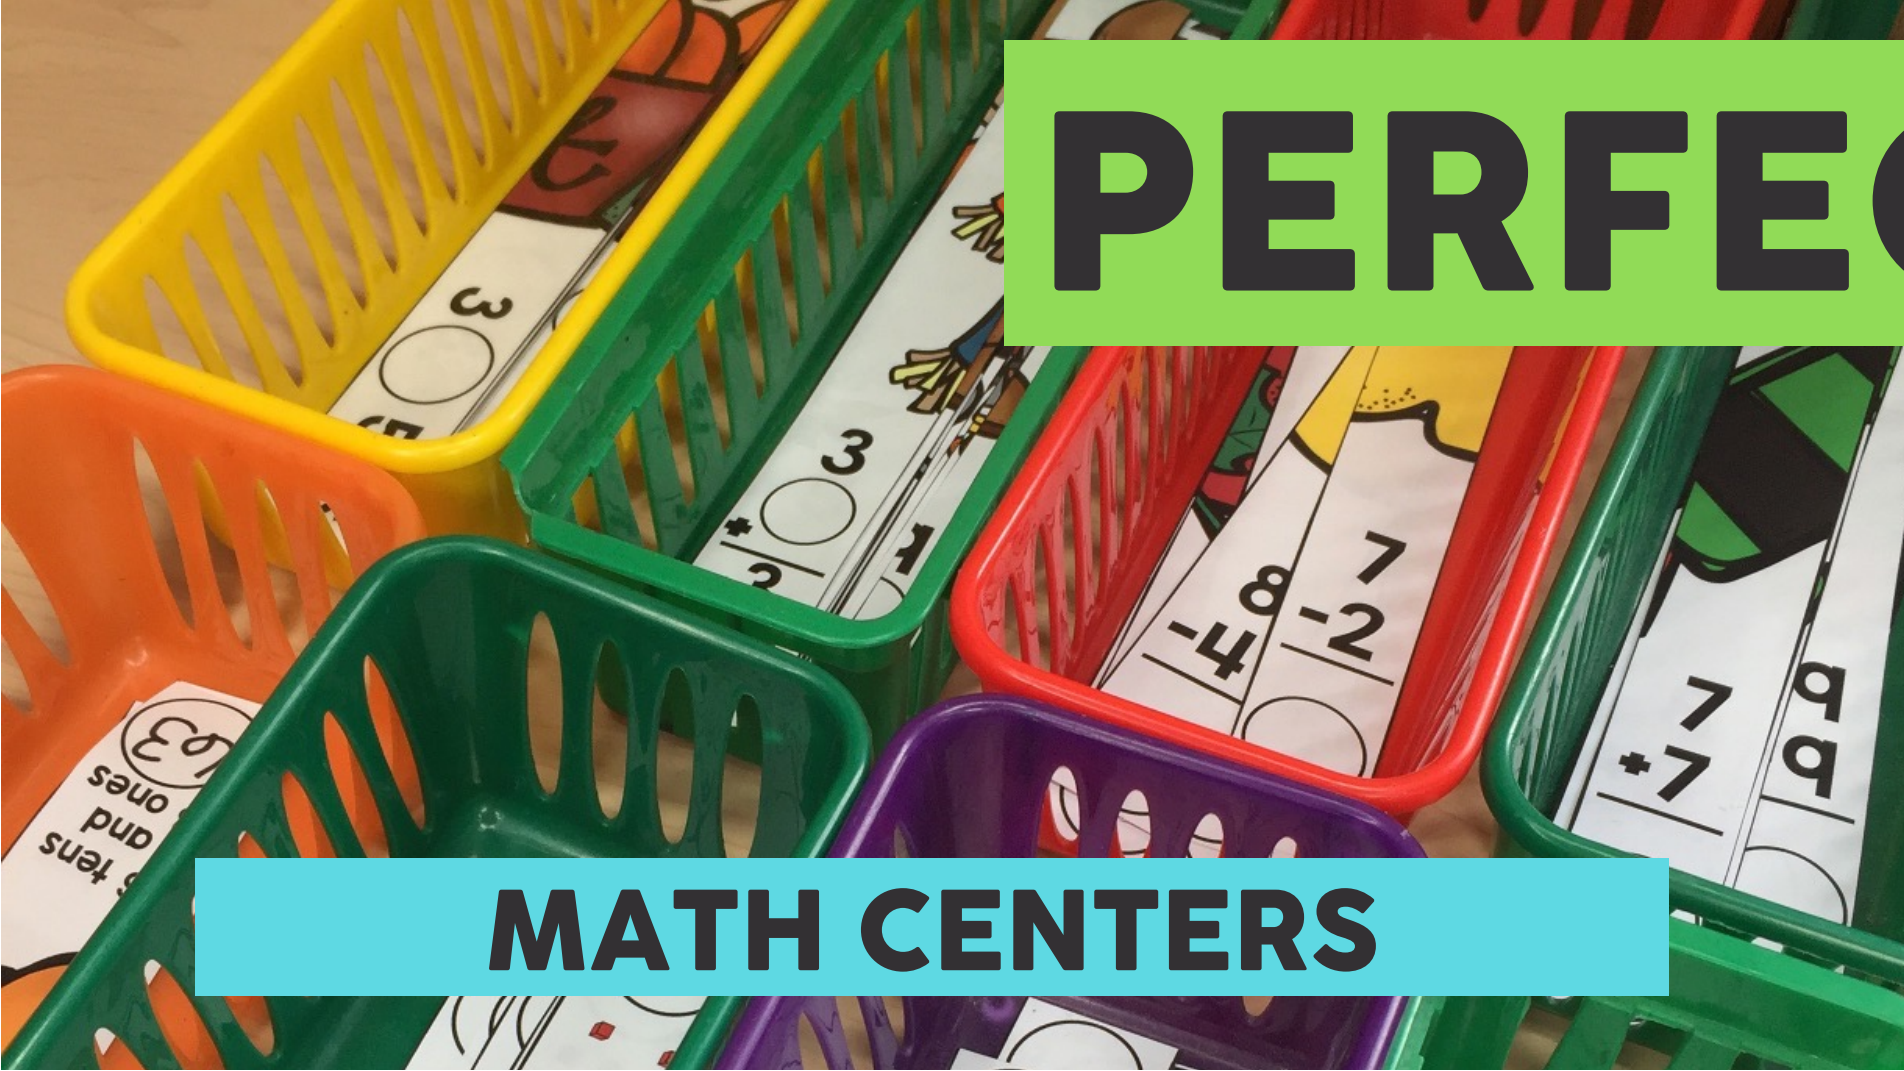

Need resources for math skill review?

Each math puzzle focuses on one math skill. This provides targeted practice for students. It's a puzzle, so they don't even realize they're learning.

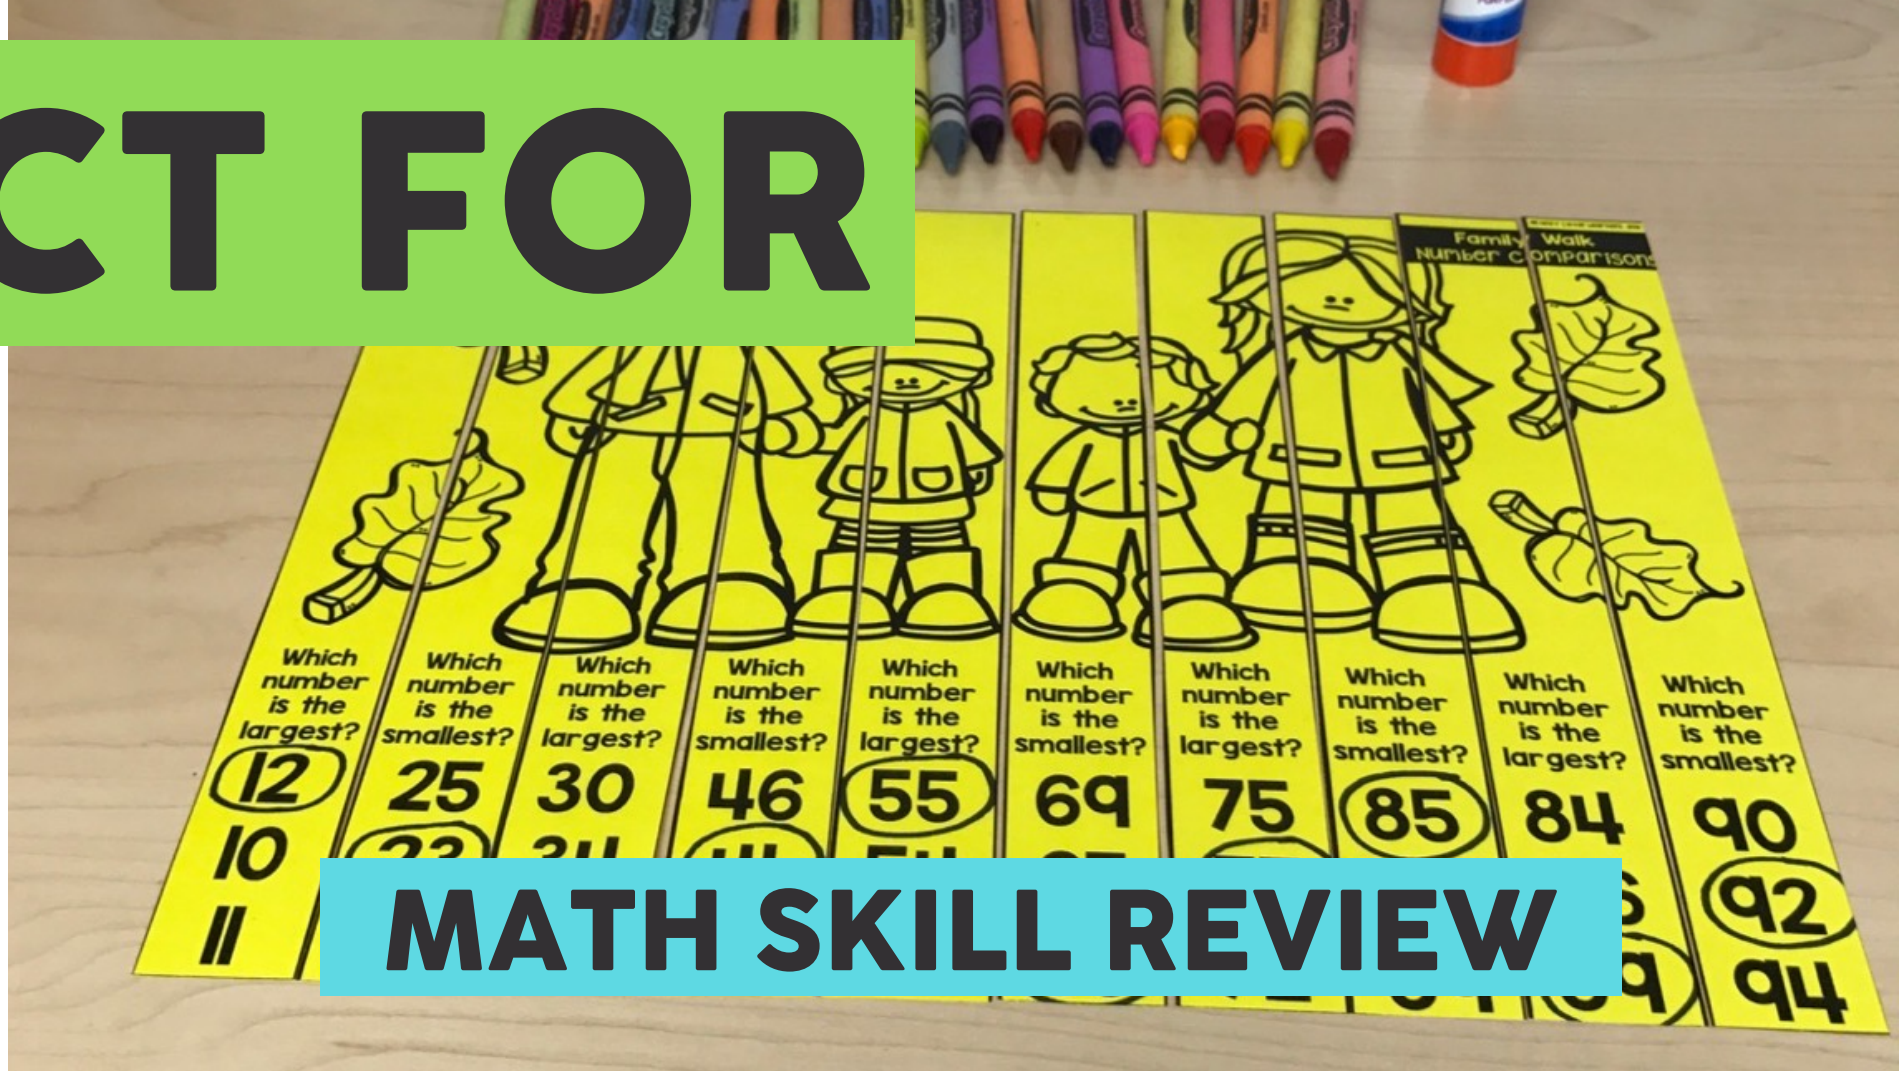

Looking for self-checking activities?

Students solve the problems. Then, they put the puzzle pieces in order from smallest to greatest. If the puzzle is mixed up, they need to check their answer!
